## 500+ válogatott kínai beszállító

## SPORT

2024.05.
v.1.0.

**Milyen beszállítók termékeit tartalmazza a Kimport katalógus?**

500+ válogatott kínai gyártó termékeiből összeállított termékkatalógus. A beszállítók nem az aktív vagy korábbi ügyfeleink beszállítói, hanem a következő nagyvállalatok (aktív vagy korábbi) beszállítói (kékre kattintva a forrás): LIDL (DE), ALDI (DE), KMART (AU), JOHN LEWIS (UK)
A forrásokon összesen közel 3000 kínai gyártó cégnevét találjuk. Ezen cégek hátterét leelenőriztük (így), és az 1000 általunk legjobbnak (legkisebb kockázat) ítélt vállalattal felvettük a kapcsolatot. Ezek közül 513 volt nyitott az együttműködésre. Ezen válogatott beszállítók termékeit tartalmazza ez és a többi Kimport katalógus.

**Ár? MOQ? Gyártási idő? CE?**

A termékek az esetek 99%-ában nincsenek készleten! A gyártási idő beszállítónként és termékcsoportonként változik! A rendelhető minimum mennyiségek beszállítónként és termékcsportonként eltérőek, az árak pedig a gyártási kapacitás, alapanyag árak és árfolyam (USD/RMB) ingadozása miatt változnak, ezért minden esetben egyedi ajánlatot kell kérni! A termékek nagy részéhez van érvényes CE certifikát, de nem minden esetben, viszont megfelelnek a CE sztenderdeknek. Egyes esetekben elképzelhető, hogy külön kell CE-t csináltatni!

**Szállítás?**

Korlátlan mennyiségű beszállítótól (minden oldalon bal alul található az adott beszállító kódja) lehet rendelni és konszolidáljuk a rendelést úgy, hogy egy (vagy minél kevesebb) rendelésként lehessen kezelni az importfolyamat során. Segíti az ügymenetet, amennyiben egy beszállítótól minél több terméket választunk, és összesen minél kevesebb különböző beszállítótól vásárolunk. Shenzhen, Ningbo, Qingdao, Jinhua és Xi'an városokban is rendelkezünk olyan raktárral ahol az áruk konszolidációját és feladását, igény szerint további címkézési műveleteket végre tudunk hajtani.

**Mennyibe kerül ez?**

Díjunk az SKU-k száma, áruérték és a kiválasztott beszállítók mennyiségétől függ, jellemzően az áruérték 3-6%-a.

Vámkezelésben, betarifálásban, előzetes szállítási díj kalkulációban is állunk rendelkezésükre, tehát segítünk megállapítani az egy termékre eső megközelítő beszerzési árat (a szállítási díjak előzetesen nem határozhatóak meg 100% pontossággal).

**Árajánlatkéréshez kérjük megadni a beszállító kódját és amennyiben van a termékkép mellett termékkód, úgy azt is megjelölni!**

## How to use

step1. Put the cold beverage.

step2. Screw tight the lid (Be sure the lid is tight).

step3. Put the nitrogen bombs in the hold .

step4. Close the lid to inject the nitro bomb into the bottle . step5. After “Squeaking” sound , the beverage is ready. step6. Press the button to enjoy delicious beverages.

## VITALITY & EXPLORATION & SAFETY

If camouflage is mimicry for animals, then the design of this board is mimicry of water sports. Using green camouflage as the main color for this board you can blend in and explore the forest on the water.
Green also gives you the feeling of being in the forest, feeling the vitality of plants and makes you feel comfortable both physically and mentally.

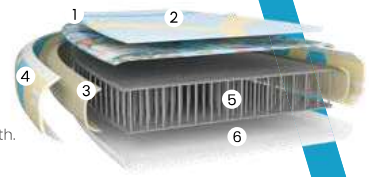
## Cosmetic Art Printing Technology

Cosmetic Art Printing (CAP) Technology is an auto printing process based on pre-designed patterns at high resolution using the best material of our board. It allows print at single colors and complicated textures and ensures color intensity and fastness to resist over time.



**1. High Pressure Valve.** For extreme air and water tightness.
**2. EVA Foam Deck Pad.** Soft texture and full of friction against slip.
**3. Thermal Bonding Inner Rail Layer.** For extra air tight seal.
**4. Thermal Bonding Outer Rail Layer.** For smooth and compact bonding of all layers.
**5. IDS(I-Drop Stitch Core).** For higher compression and tensile strength.
**6. CAP Composite Coating.** Auto printing process based on pre-designed patterns to ensure color intensity and fastness.

# Wetsuit

The wetsuits are made of premium neoprene laminated with stretchy nylon fabric/Lycra, provide good body protection and keep you warm while you are surfing, diving, snorkeling, swimming, sailing, kayaking etc. Ultra soft and super stretch neoprene, flatlock stitch construction gives you a compression and comfortable fit.

## MATERIALS

Max insulation with minimal water absorption

Ultra Stretch, Super soft and premium neoprene for superior feel, flexibility and high performance

## SEAM CONSTRUCTION

Glued and Blind stitched seam is stronger and more flexible, If the thread breaks, the seam will not leak.

The stitching only goes part way through the neoprene, it is also glued so there is no leakage through the seams.

## FEATURES & TECHNOLOGY

Front Upper Zip Entry system offers a fresh alternative.

Whether you are surfing fast or squatting on the surfboard, the wear–resistant materials on your knees resist the wear and tears of all water sports.

# FULL WETSUIT FOR WOMEN

LD-0539

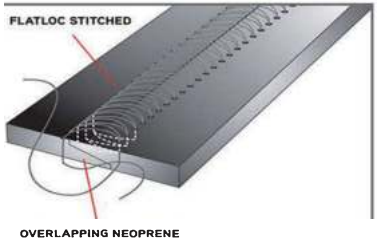
## WETSUIT ENTRIES

The sturdy, reliable 10#YKK zipper is backed with an inner neoprene gusset to prevent flushing and avoid pinching or snags. The extra–long zipper is convenient to put on and take off.

With zipper at the cuff and leg opening of this full body wetsuit is Easy to put it on and take it off.

## SEAM CONSTRUCTION

The stitch uses 4 needles and 6 threads, and works by overlapping the panels and sewing them together. It is a strong stitch and is comfortable.



Flat–lock stitched seams lay flat to eliminate bulk and prevent chafing while strengthening seams for added durability.

## FEATURES & TECHNOLOGY

Sharkskin at the collar, cuff and leg opening of this full body wetsuit to prevent rolling and cold water in.

Whether you are surfing fast or squatting on the surfboard, the wear–resistant materials on your knees resist the wear and tears of all water sports.

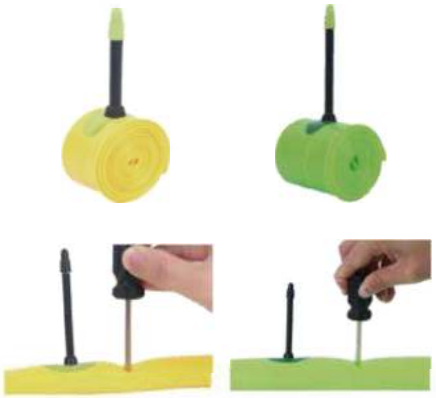
# New Materials Tube



## 【LIght Weight 】

The weight of the bicycle inner tube is only 36 grams, which is about 100 grams less than the traditional butyl rubber inner tube, a pair of which can save 200 grams, reduce the burden on the bicycle, and make the ride lighter.

## 【FITS MULTIPLE TIRE SIZES】

All sizes of bicycle inner tubes can be customized.

## 【WEAR-RESISTANT AND DURABLE】

The bicycle inner tube adopts a special TPU material, which also greatly improves the durability compared with the traditional rubber inner tube; In addition, the TUP material is oil and water resistant, and has excellent load-carrying capacity and impact resistance.

## 【REDUCE ROLLING RESISTANCE】

Because the TPU bike inner tube is only 36g, it will be lighter and more delicatethan the ordinary 300g rubber inner tube, and the friction force generated on the tire is small, which can achieve the maximum speed and performance.

## 【SAVINGS】

It is durable enough to save you some expenses; It also saves you the trouble of changing the inner tube of your bike frequently; This is a device for outdoor riding enthusiasts to consider.
