KATALÓGUS

500+ válogatott kínai beszállító

SZABADTÉRI TERMÉKEK - OUTDOOR

2024.05.
v.1.0.

Milyen beszállítók termékeit tartalmazza a Kimport katalógus?

500+ válogatott kínai gyártó termékeiből összeállított termékkatalógus. A beszállítók nem az aktív vagy korábbi ügyfeleink beszállítói, hanem a következő nagyvállalatok (aktív vagy korábbi) beszállítói (kékre kattintva a forrás): LIDL (DE), ALDI (DE), KMART (AU), JOHN LEWIS (UK)
A forrásokon összesen közel 3000 kínai gyártó cégnevét találjuk. Ezen cégek hátterét leelenőriztük (így), és az 1000 általunk legjobbnak (legkisebb kockázat) ítélt vállalattal felvettük a kapcsolatot. Ezek közül 513 volt nyitott az együttműködésre. Ezen válogatott beszállítók termékeit tartalmazza ez és a többi Kimport katalógus.

Ár? MOQ? Gyártási idő? CE?

A termékek az esetek 99%-ában nincsenek készleten! A gyártási idő beszállítónként és termékcsoportonként változik! A rendelhető minimum mennyiségek beszállítónként és termékcsportonként eltérőek, az árak pedig a gyártási kapacitás, alapanyag árak és árfolyam (USD/RMB) ingadozása miatt változnak, ezért minden esetben egyedi ajánlatot kell kérni! A termékek nagy részéhez van érvényes CE certifikát, de nem minden esetben, viszont megfelelnek a CE sztenderdeknek. Egyes esetekben elképzelhető, hogy külön kell CE-t csináltatni!

Szállítás?

Korlátlan mennyiségű beszállítótól (minden oldalon bal alul található az adott beszállító kódja) lehet rendelni és konszolidáljuk a rendelést úgy, hogy egy (vagy minél kevesebb) rendelésként lehessen kezelni az importfolyamat során. Segíti az ügymenetet, amennyiben egy beszállítótól minél több terméket választunk, és összesen minél kevesebb különböző beszállítótól vásárolunk. Shenzhen, Ningbo, Qingdao, Jinhua és Xi'an városokban is rendelkezünk olyan raktárral ahol az áruk konszolidációját és feladását, igény szerint további címkézési műveleteket végre tudunk hajtani.

Mennyibe kerül ez?

Díjunk az SKU-k száma, áruérték és a kiválasztott beszállítók mennyiségétől függ, jellemzően az áruérték 3-6%-a.

Vámkezelésben, betarifálásban, előzetes szállítási díj kalkulációban is állunk rendelkezésükre, tehát segítünk megállapítani az egy termékre eső megközelítő beszerzési árat (a szállítási díjak előzetesen nem határozhatóak meg 100% pontossággal).

Árajánlatkéréshez kérjük megadni a beszállító kódját és amennyiben van a termékkép mellett termékkód, úgy azt is megjelölni!

BWSKD series

- Considering the situation of mail marketing in European,Birchwoods improve this new design unlike the conventional awning.It is simple for DIY installation and maintaining, popular with convenient operation via handle crank or remote control.
- Small package size is better for the transportation. While different size of spare parts can realize many choices.
- Patent products.

Serve cart is designed for a wide variety of applications & working environment to include camping, barbecue party, office, home/kitchen & more

*Strudy Construction

*Humanization design

*Multi-Fuctional, it's a good choice for using in kitchens, dining room or outside for barbecue.

*Anti-rust

*Minimal assembly: Our multifunctional metal cart requires super minimal assembly.

*Smooth rolling: Four smooth rolling casters rotate a full 360 degrees which makes this utility cart incredibly easy to push in any direction, folded or un-folded! Each caster is non-marring and two wheels have locking capabilities.

Prompt Set™

Summer Holiday

Enjoy!

Prompt Set™ is a "self-formed" swimming pool, which means you only need to inflate the top ring of the pool. It is easy to disassemble, compact and store during winter season. Wide choice of optional accessories allows you to assemble your perfect set easily in 10-30 minutes.

Healthy Growth

Prompt Set™

Inflatable Ring

Ladder Material

Engineered for high strength and durability, provides superior resistance to corrosion and long service life

Easy Installation

Assembly usually takes only 10 minutes, excluding water filling time with 1 ~ 2 people

INTEGRATED PUMP

Design for Safe and Easy Use

Safe and efficient double insulated heating system (Patented)
To provide advanced enjoyment, Our SPA has applied for a patented double-insulated heating structure, which improves the safety performance of the heater by 20 times compared to others in the market.

Smart water treatment system
The filter cartridge should be regularly cleaned and changed to maintain good water quality, there will be a reminder popping up when the spa keeps working 150 hours.

3-speeds massage, allowing you to have a variety of choices at different time periods. (Optional)

Efficient ozone sterilization system (Optional)
An amount of active ozone (25mg/h) constantly inject into the water of spa to capture and decompose harmful microorganisms, bacteria, germs and others in the water. Generate harmless water(H2O) and oxygen (O2) to keep your healthy.

- Smart Application(Optional)
- Timer allows users to switch on the heating in advance by setting the time during 1~999 hours
- Anti-Freeze automatic heating prevents water from freezing and protects SPA

Coating

Polishing

Polishing is aimed at obtaining a smooth surface or a specular gloss. When polishing, the high-speedrotating polishing wheel (circumferential speed of 20 m / sec or more) is pressed on the workpiece to causethe abrasive rolling and micro-cutting on the surface of the workpiece, thereby obtaining the bright Machined surface

Spray paint

A method of applying a uniform and fine mist droplet to a surface of an object to be coated by means or airpressure by means of a spray gun .Low cost and environmentally friendly paint

Powder coating

The coating powder does not need thin materials, construction environmental protection, non-toxic to humanbody;Excellent coating appearance, strong adhesion, high mechanical strength, spraying curing time is short;Coating corrosion - resistant, wear - resistant, environmental protection, non - toxic

Electroplate

The electroplating process is a method of laying a layer of metal on the conductor by the principle ofelectrolysis,which can enhance the corrosion resistance of the metal (the corrosion-resistant metal is mainlyused for the electroplating metal), increase the hardness, prevent the abrasion, improve the conductivity, thesmoothness and the resistance.Heat and beautiful appearance

etc. ...

Logo

Silk screen

Screen printing is not limited by the size and shape of the substrate. The ink layer has strong covering powerand is suitable for various types of ink. It is convenient to plate, cheap price and low cost.Generally only 1-3colors can be printed

Emboss

Emboss must have corresponding molds, the high cost, pattern and product are integrated, will not fall off,can improve product grade).The color of the logo is the same as the color of the cup

Heat transfer printing

The transfer process transfers the fine pattern on the transfer film to the surface of the product through onestreatment (heating and pressurization) by the heat transfer machine.After forming, the ink layer is combinedwith the surface of the product,which is realistic and beautiful, greatly improves the grade of the product,low production cost, strong hiding power, strong adhesion, conforms to the green printing standard, and no pollution.

Laser logo

Laser engraving process is based on CNC technology, safe and reliable: non-contact processing, precise andmeticulous: processing accuracy can reach 0.02mm, saving environmental protection: small beam and spotdiameter, consistent with the batch effect, high speed,low cost: not Limited by the number of processing

Sublimation

Sublimation is mainly to heat the pigment molecules into the medium. The color is vivid and the layers aredistinct. The sublimation technology is a printing technology that truly achieves photo quality. It is waterproof,UV-resistant and anti-fingerprint than other printing technologies. Have a greater advantage in performanceand higher cost

Water sticker

The water sticker is actually a brand-new transfer technology. It is applied to the surface of any curved andcurved surface. The pattern and color are vivid and vivid, which greatly increases the added value of the product.

3D printing

The pattern is printed on the product through a 3D printer, the color is bright, the pattern has a concave andconvex shape, and the complicated graphic can be operated

Gas dye printing

Gas dye printing is a consumable for printing on a special layer of paper (flower but) for gas dyeing withspecial gas-dyeing ink. Any complicated pattern can be transferred, there will be 360-degree seam, high cost,clear pattern

Water transfer printing

Water transfer is a kind of printing that uses water as a dissolving medium to transfer colored patternstransfer paperfilm onto the product and transfer any natural lines,photographs and images onto the product. The limitation is that it The transfer image is easily deformed, which is related to the shape of the product,and also related to the nature of the water transfer film itself. The higher the price, the more complicated the process
