KATALÓGUS

500+ válogatott kínai beszállító

VILÁGÍTÁSTECHNIKA - LIGHTING

2024.05.
v.1.0.

Milyen beszállítók termékeit tartalmazza a Kimport katalógus?

500+ válogatott kínai gyártó termékeiből összeállított termékkatalógus. A beszállítók nem az aktív vagy korábbi ügyfeleink beszállítói, hanem a következő nagyvállalatok (aktív vagy korábbi) beszállítói (kékre kattintva a forrás): LIDL (DE), ALDI (DE), KMART (AU), JOHN LEWIS (UK)
A forrásokon összesen közel 3000 kínai gyártó cégnevét találjuk. Ezen cégek hátterét leelenőriztük (így), és az 1000 általunk legjobbnak (legkisebb kockázat) ítélt vállalattal felvettük a kapcsolatot. Ezek közül 513 volt nyitott az együttműködésre. Ezen válogatott beszállítók termékeit tartalmazza ez és a többi Kimport katalógus.

Ár? MOQ? Gyártási idő? CE?

A termékek az esetek 99%-ában nincsenek készleten! A gyártási idő beszállítónként és termékcsoportonként változik! A rendelhető minimum mennyiségek beszállítónként és termékcsportonként eltérőek, az árak pedig a gyártási kapacitás, alapanyag árak és árfolyam (USD/RMB) ingadozása miatt változnak, ezért minden esetben egyedi ajánlatot kell kérni! A termékek nagy részéhez van érvényes CE certifikát, de nem minden esetben, viszont megfelelnek a CE sztenderdeknek. Egyes esetekben elképzelhető, hogy külön kell CE-t csináltatni!

Szállítás?

Korlátlan mennyiségű beszállítótól (minden oldalon bal alul található az adott beszállító kódja) lehet rendelni és konszolidáljuk a rendelést úgy, hogy egy (vagy minél kevesebb) rendelésként lehessen kezelni az importfolyamat során. Segíti az ügymenetet, amennyiben egy beszállítótól minél több terméket választunk, és összesen minél kevesebb különböző beszállítótól vásárolunk. Shenzhen, Ningbo, Qingdao, Jinhua és Xi'an városokban is rendelkezünk olyan raktárral ahol az áruk konszolidációját és feladását, igény szerint további címkézési műveleteket végre tudunk hajtani.

Mennyibe kerül ez?

Díjunk az SKU-k száma, áruérték és a kiválasztott beszállítók mennyiségétől függ, jellemzően az áruérték 3-6%-a.

Vámkezelésben, betarifálásban, előzetes szállítási díj kalkulációban is állunk rendelkezésükre, tehát segítünk megállapítani az egy termékre eső megközelítő beszerzési árat (a szállítási díjak előzetesen nem határozhatóak meg 100% pontossággal).

Árajánlatkéréshez kérjük megadni a beszállító kódját és amennyiben van a termékkép mellett termékkód, úgy azt is megjelölni!

LED CEILING LIGHT

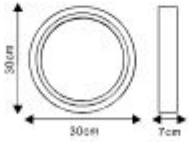

LED ceiling light with remote or mobile control
Model: **D110(CCT)**
Built-in Driver: 220VAC~240VAC,50Hz
Power: 17W
Lamp: 2700K/LED/0.075W x 84PCS
6000K/LED/0.075W x 84PCS
Lumen: 1260LM
Color: White/Titan

LED ceiling light with remote or mobile control
Model: **D111(CCT)**
Built-in Driver: 220VAC~240VAC,50Hz
Power: 18W
Lamp: 2700K/LED/0.15W x 48PCS
6000K/LED/0.15W x 48PCS
Lumen: 1440LM
Color: White/Titan

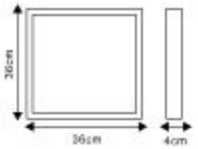

LED ceiling light with remote or mobile control
Model: **D112(CCT)**
Built-in Driver: 220VAC~240VAC,50Hz
Power: 18W
Lamp: 2700K/LED/0.075W x 96PCS
6000K/LED/0.075W x 96PCS
Lumen: 1440LM
Color: White/Titan

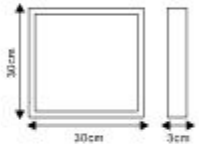

LED CEILING LIGHT

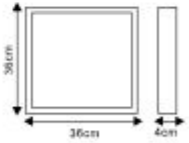

LED ceiling light with remote or mobile control
Model: **D114(CCT)**
Built-in Driver: 220VAC~240VAC,50Hz
Power: 18W
Lamp: 2700K/LED/0.1W x 72PCS
6000K/LED/0.1W x 72PCS
Lumen: 1440LM
Color: White/Titan

LED ceiling light with remote or mobile control
Model: **D115(CCT)**
Built-in Driver: 220VAC~240VAC,50Hz
Power: 17W
Lamp: 2700K/LED/0.225W x 32PCS
6000K/LED/0.225W x 32PCS
Lumen: 1440LM

MR8 - SD25A/SD25B/SD25C

Product Advantage

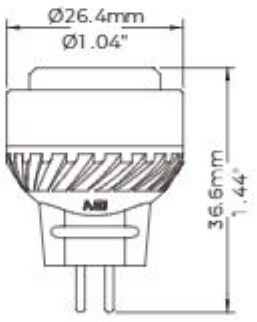

- Average life of up to 50,000h helps reduce replacement costs.
- Suitable for use in enclosed fixtures.
- ETL/FCC/CE Listed.
- Defect rate<0.3%

Overview

Using only 2.5 watts of energy, this LED MR8 spotlight produces a powerful 120-230 lumens, consuming so little energy allows it to last longer. Sporting a massive beam spread of 80°, this LED MR8 lamp/bulb is capable of covering large areas of landscape, allowing you to use smaller fixtures to take care of your more demanding outdoor areas. Ideal for new fixtures, or retrofitting existing outdoor fixtures.

Application: decorative lighting; Display Lighting; accent Lighting; low-voltage Lighting; landscape lighting

Product Advantage

- Potted and/or coated electronics protect against moisture.
- Dimmable with most magnetic transformers.
- Generates consistent light output for systems with an operating range from 12v to 24v AC/DC with no loss in light output.
- 50,000 hour life in an enclosed fixture, defective rate <0.3%.
- Designed and listed for outdoor use in enclosed fixtures or wet locations.
- Integrated, high output LEDs tightly binned for high CRI, color uniformity an color quality.
- High total lumens and lumens per watt (efficacy).
- cETL & FCC & CE compliant

Overview

Wonka has just introduced a whole new line of replacement LED lamps. There has never been a reliable MR16 replacement lamp until now. It is a completely sealed, wet-location approved design. The electronics are weather coated to match the end-use application, assuring superior durability for all-weather performance. All of the bulbs have a cast aluminum heat sink for enhanced thermal management.

Aapplication: Mainly used for outdoor landscape lighting, can also be used indoors, such as for shopping mall, bathroom (damp with water vapor).

PAR38 - SD26A0/SD26A

Product Advantage

- Classic color matches , standard shape size and utility for application.
- Under the premise of good heat dissipation, it is designed with light weight tosave the freight cost.
- Cost-effective, The highestlight efficacy is 90 lm/W. 80% energy savings
- Outstanding Dimming performance.Working temperature: -40°C~45°C.

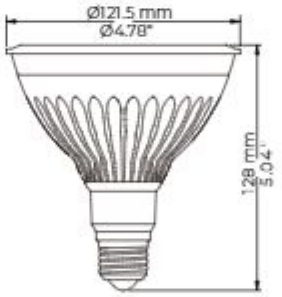

Overview

We develop this new PAR38 based on the previous version and demand in the market, in order to solve the general problems: not waterproof,too heavy, nonstandard size, and high price.

This new lamp has standard size, light weight. It is equipped with 12/16pcs original LEDS, intelligent power supply. In this way, it is cost-effective with general wonderful performance. And we make it much easier for consumers to try with the LED PAR38. The highest light efficacy is over 100 lm/W.

Application: store, stage, theatre, Gym&dancing room, public buildingoutdoor lighting/landscapelighting etc.

Product Advantage

Local IR Dimming

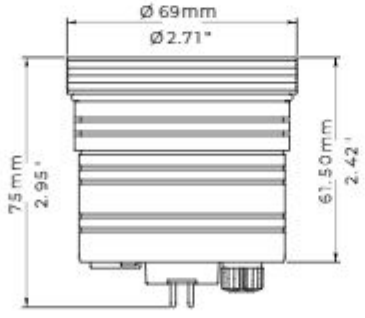

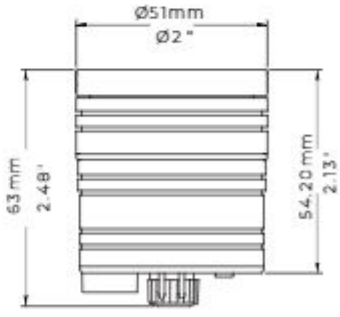

Overview

Since there is a power limitation on the ANSI standard size of MR16 and it's hard to achieve the functions of power adjustable and beam spread changeable. However, the demand for higher brightness light engines in the market is increasing rapidly. Customers hope that if the adjustable power, changeable beam angles and reasonable price can be realized on a brand new enclosure.That will be a good experience.

Based on these elements, Wonka decided to develop a new generation of module LEDs combined with a smarter fixture.

While using the new led module combined with Wonka's fixtures,it can achieve brightness increase up to 50%.More surprisingly, the power can be adjusted manuallyand the beam spread also can be adjustable.We made all features in a new fixture,but the whole pricing is reduced.

Application: store, stage, theatre, Gym&dancing room, public buildingoutdoor lighting/landscapelighting etc.

Product Advantage

- Small and exquisite design excellent compatiblity
- High quality and good price super brightness, beautiful outlook
- Various Color temperature suitable for more different application
- IP65 outdoor rated

Overview

The LED G4 on the market is generally of poor quality and has a short lifespan. Therefore, customers require us to developreli-able G4 series, such as ZS01, ZS02, ZS03, ZS04, ZS05, etc. Howev-er, due to previous technology and market, the G4 series is non-waterproof, which greatly limits the application. After careful testing, we decided to develop a new waterproof G4.Adopting smart structural design, it becomes an organic unity in terms of performance, lifespan and manufacturing.Currently we only produce in 2w, but will expand more options after receiving market feedback.

Product Advantage

- Lamp housing utilizes the pure white ceramic, which offers a good looking, comfortablefeeling as well as good heat dissipation.
- Light weight and cute.Global standard candle dimensions and can replace the traditional candle lights.
- No driver inside, but long life in a high technology way, which shows the ability of our R&D.
- High efficiency oflight output, energy saving
- Working temperature: -40°C-45°C.
- Clear and frosted glass covers available

Overview

We designed this new LED candle light for the traditional C37/C42 candle light market.Adopts double radiator structure design. High thermal conductivity aluminum is used as the heat sink internally, and ceramic physical isolation is used externally, which greatly improves the grade and heat dissipation.Light-diffusing PC is used as the lampshade, which has high light transmittance. And the output light is soft and evenly distributed, avoiding defects such as aperture problems of the glass cover.

Application: Home, restaurant, hotel, etc.

- High lumen output, high efficacy, high CRI.
- Soft light and no glare.
- Wonderful dimming performance.
- Operating Temperature -20C~40°C

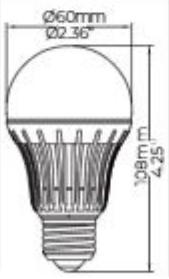

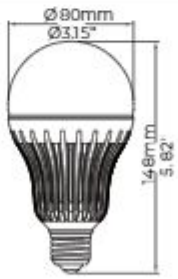

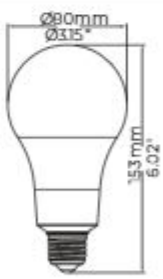

Overview

The lamp is a newly developed standard size LED G60, G80 bulb. The unique double-layer structuredesign not only ensures excellent performance butis also safe to use.

Soft light, wide beam angle, good lumen output, high CRI and high efficacy. Smooth dimming, dimmable and non-dimmable versions available.

Warm white output of 100 lm/w, equivalent totraditional incandescent light bulbs. It will bring you a new lighting experience.Various powers and prices to meet your various needs.

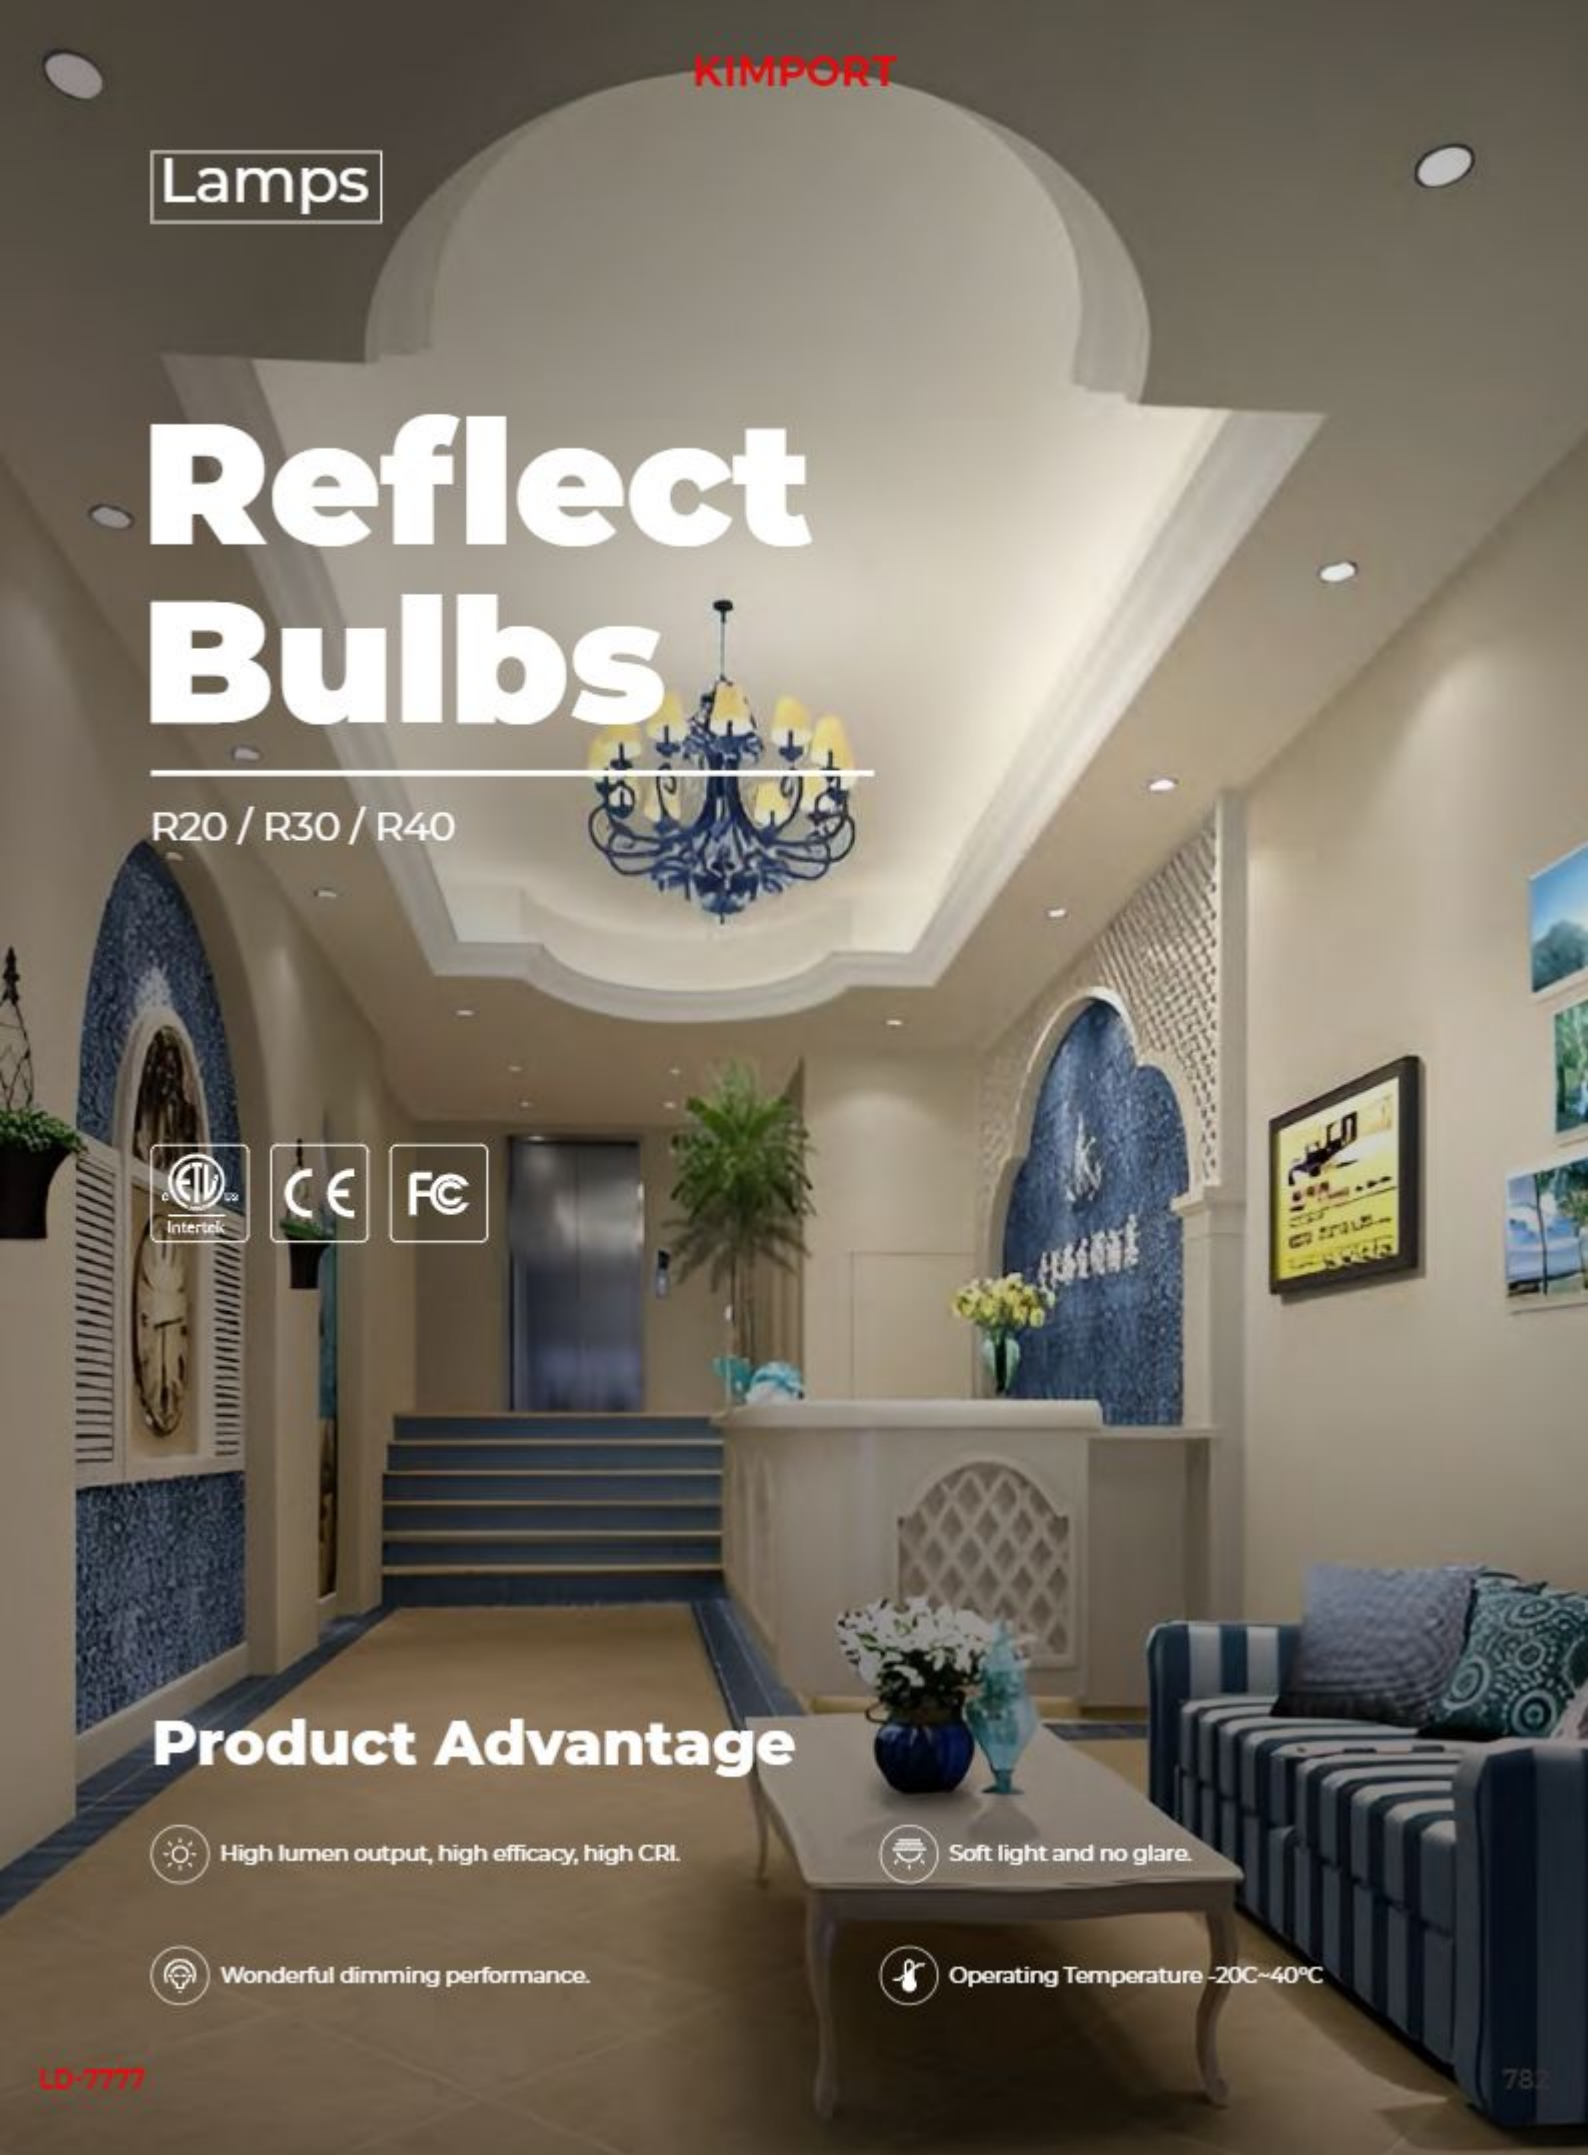

Appliction: home, hall, etc.

T5 - DG08/DG19

Product Advantage

- High-brightness LED light source provides brighter,more uniform, and more comfortable lighting effects.
- Unique aluminum heat sink design extends he lifespan to over 50,000 hours, reducing the frequency and cost of replacing lamps.
- Free from harmful substances such as mercury, it does not produce harmful radiation such as ultraviolet or infrared rays, making it more environmentally friendly and healthy.
- External power supply option reduces nstallation and maintenance costs for greater convenience
- The tube features an effective anti-breakage design for enhanced safety assurance.

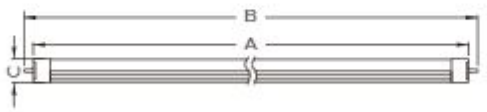

Overview

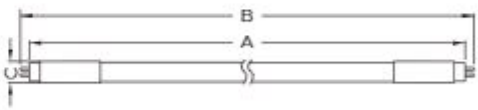

The common T5 tubes on the market are mostly low-cost T5 LED glass tubes without power supply or with simplified power supply. While reducing costs, performance and quality are also sacrificed, especially the high lamp failure rate and shortened lifespan, while the application market for high-quality T5 LED glass tubes is mostly engineering orders, which address difficulties such as small demand quantities, multi-batches, multi-models, tight schedule, and rapid changes. In response to the above requirements, a new T5 LED glass tube design structure and production process have been developed. Under the premise of reasonable and controllable comprehensive costs, it can not only ensure product quality, but also provide flexible production and rapid response, effectively meeting market demand, increase competitiveness.

AL+PC T8 - Overview

With the emergence and application of high-power LED light sources, the energy-saving and emission reduction in lighting has shown a thriving and gratifying situation. Due to office lighting and public building lighting accounting for a large part of lighting energy consumption, T8 fluorescent tubes are widely used in this area. However, traditional T8 fluorescent tubes have various defects such as high heat generation, high energy consumption, and mercury pollution. In this case, the demand for replacing T8 tubes with new light sources becomes more urgent. Our company is based on the aforementioned social needs, dares to take social responsibility, and has invested funds to develop a series of LED T8 tubes with patented structures.

Compared to the old version products, the new T8 LED tube has improved length specifications, increased beam angle, enhanced light efficiency, and reduced price. It is available in both residential sizes of 60cm/120cm and industrial sizes of 90cm/150cm/240cm. There are two types of power supply options: built-in power supply and external power supply, which can meet various needs.

Sensor T8 - Overview

With highly sensitive human body sensing ability, the tube lamp can automatically sense the presence of a human and light up when needed, and automatically turn off after leaving to realize intelligent lighting. Automatic control saves energy, extends tube lamp life, reduces maintenance costs, and achieves energy conservation and environmental protection.

Suitable for offices, shops, warehouses, parking lots and other places to provide intelligent lighting solutions.

LINEAR LIGHT - DG06 Series

Product Advantage

- Through the special design of the connection socket, you can easily combine the lights in different ways such line, parallelvertical and this way it's suitable for the different applications.
- Using simple connection medium with snap joint design, easy to install, easy to dismantle.
- Through the unique design of the Pin box integrated connection cable, customers can easily make the whole circuit connected saving time, less effort, free of worry and less of money.
- As a result of unique special connection socket, it makes no obvious gaps and dark areas among the connection point.
- Throuch smart and considerate desian, customers are able o choose accessories flexible and change the installation appropriate, no waste of material and cost.
- Through the streamline design ot the structure and the flexible assembly methods, this product is able to easily build up a unicueand fascinating space filled of light and shadow.

Overview

The newly developed OLL LED light is our original design, with persistence on innovation, environmental protection and energy saving. Safe, durable and flexible. It meets the challenge of multiple combinations of lighting fixture, with no obvious dark areas at the connection points.

Various sizes, wattages and brightness are designed according to different requirements by optimizing all optical and electrical parameters. In addition, room has been reserved for upgrades and improvements so that it can serve customers longer. Through unique and novel combinations and flexible installations. It is suitable for household, office, public and commercial lighting projects.

Create a comfortable and vivid lighting space to easily meet fashionable lighting and energy saving needs.

TRI-PROOF LIGHT - DG10A

Product Advantage

- Highly energy efficient - up to 130 lm/w
- IP67 and IK10 for indoor and outdoor use under all conditions
- Single installation or use as continuous line
- Quick and easy installation

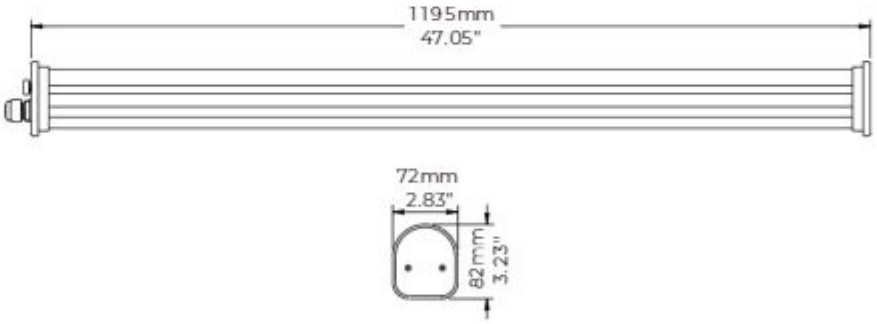

Overview

The DG10 is a modern and clever designed LED Tri-proof light for industrial areas. Its polycarbonate housing is cast from a single mold and absolutely dust and waterproof. The end caps on both sides can be opened without tools and they include a durable silicon seal which makes this product truly suitable for indoor and outdoor use even under harsh conditions. Its wide beam angel of 130° and the high grade SMD LED chips assure a perfectly homogeneous lighting distribution. A suitably large aluminum core allows for good cooling and a long lifespan. It can be installed as a single light solution as well as in a continuous line throughout a hall.

Suitable for Production areas with harsh conditions, Parking Facilities, corridors and halls, Storage rooms and warehouses.

Application: Suitable for lighting places such as shops, supermarkets,commercial complexes, hotels, offices, etc.

- IP68 rated allows the fixture to be fully submerged in a pond, stream,fountain,or other water feature area.
- Volts: 12-24VAC/DC
- Small light that can easily be hidden
- LED Mr16 lamp light source,available in various power & beam angle options
- 3-in-1 accent light,up/down light on land use, submerged for underwater accent lightCord Length: 25 feet SJOW wire.
- Optional base for mounting

Overview

The PondLight High Power is an adjustable underwater luminaire designed for installation in ponds, fountains and water features. It is fully submersible,tested to an IP68 water protection rating. A weighted base model is available, allowing the luminaire to be placed at the bottom of the pond without drilling fixing holes to mount it into place. High Power products have anextra powder coat layer to ensure maximum corrosion protection.

Application: pond,fountain,aquarium, fish tank, waterfall, swimming pool,backyard and garden.

WALL WASH - SD41A

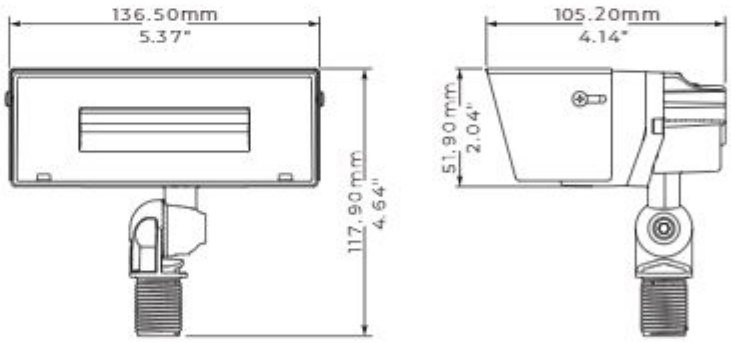

Product Advantage

- Solid cast brass construction, bronze finish guaranteed not to flake or peel.
- Auniform wide distribution wall wash with a compact design.
- Adopting a separate structure, making it easier to replace and maintain the driverand lightengine.
- IP65 rated.protected againsthigh-pressure water jets
- Provided with adjustable glare shroud

Overview

The new wall washer is designed with full consideration of the more efficient use of shell resources, easier maintenance, lower carbon and environmental protection. The structure can adopt a split design with photoelectric separation, and can consider a variety of needs. The light source module and power module can be disassembled and replaced independently, which can effectively achieve repeated waterproofing. Taking into account the loss of luminous flux caused by the light blocking of the hood, optimizing the light pattern of the light source module can bias the central light intensity toward the illuminated surface, which not only reduces glare, but also improves light utilization and makes the illuminated surface brighter and more uniform.

Overview

The product is further improved on the basis of the TJ01 series. The modular waterproof design of the wires makes it easy to maintain and use, and can be replaced without rewiring or replacing wires. Fully consider that different occasions and different times often require lighting with different color temperatures. The module supports color temperature that can be manually switched between 2200K, 2700K, and 4000K which allowing you to choose the perfect color temperature for the right scene.

DMX WALL WASH - WA01A/WA01B

Intertek | CE | FC | IP67 Waterproof | IK07

Product Advantage

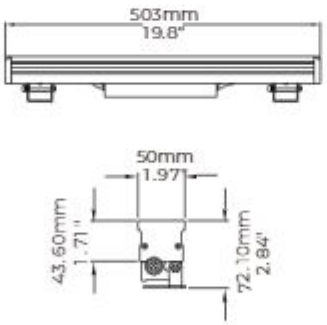

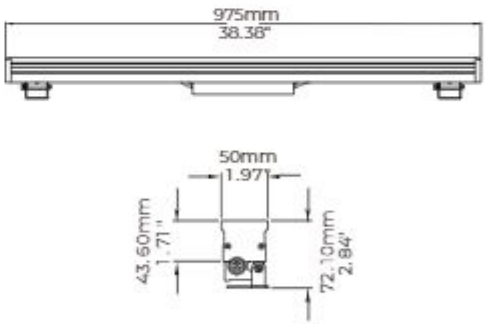

- External constant current power supply, easy to maintain and replace, reliable operation of the entire lamp, DMX512 control for more precise color control changes.
- Single-channel control full load power: 0.5m Warm White 18W, Red Light 18W, Green Light 18W, Blue Light 18W; 1.0m Warm White 36W, Red Light 36W, Green Light 36W, Blue Light 36W.
- IK07 Using 4mm tempered glass, the entire lamp has an IK07 anti-collision rating.
- IP67 Waterproof rating IP67, structure consistently reliable.
- Optional anti-glare sun visor

Overview

To further enhance our product line and meet market demands, we have designed a high-intensity aluminum alloy outdoor wall washer with a sleek appearance and high impact resistance. It features a scientifically designed waterproof structure with an IP67 waterproof rating, ensuring continuous reliability. It has uniform illumination, with excellent color mixing, high power for single-color , showcasing outstanding brightness. The replaceable design allows for easy installation and maintenance.

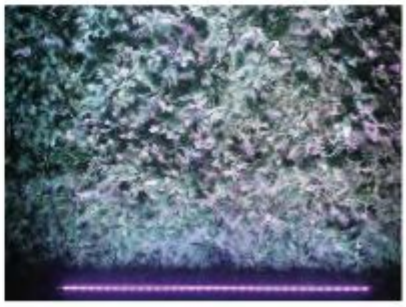

Application: bridge, building facade, park cultural wall washing lighting; building dome reflection lighting, etc.

0~10V Lights

LINEAR LIGHT - 0~10V/0~10V,CCT Change

Product Advantage

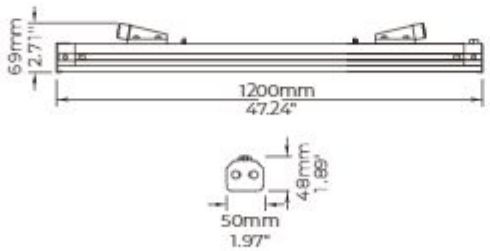

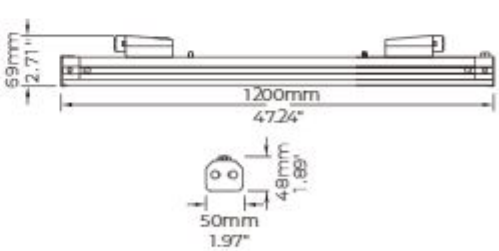

- Signal wire installation easily , multiple lamps can merge access network, individual lamp access network.
- Support 0~10V and DALI dimming.
- Support manual switching of 3 levels of color temperature.

Overview

For American market,our company developed 0-10V signal dimmable product, it can make the light control of large and long time lighting applications become convenient and fast, it is flexible for illumination adjustment, brightness and color changeable, create even more energy saving and more comfortable lighting environment.For the large project lighting application from European market, for example office building, shopping mall, restaurant mostly use DALI system for their lighting management , our company developed new Linear light-based on DALI system, it works well with this system and easily achieve purpose of saving energy.

Application: offices, industry, hospitality, educational institutions, art and culture to design products for lobbies,restaurants and similar.

Dimmer Switch

KZ04A

Product Advantage

- The Dimmer Switch provides for 12VAC dimming up to 120 watts
- Maximum power 120W, can withstand 10A current intensity
- The minimum power can be adjusted according to personal habits(Lower limit:0.8W)
- This unit can be mounted next to the 12VAC transformer or anywhere out in the field

Overview

This 120W mini dimmer can adjust the brightness of numerous landscape lamps and fixtures. It is small in size, easy to install, and highly favored by customers. It not only can provide you with a soft, stable light to use, but also can avoid rush current and protect your LED lights being damaged. Besides, it's also easy to install and simple to operate with a knob controller, making it convenient to use.

Range Extender

KZ02C

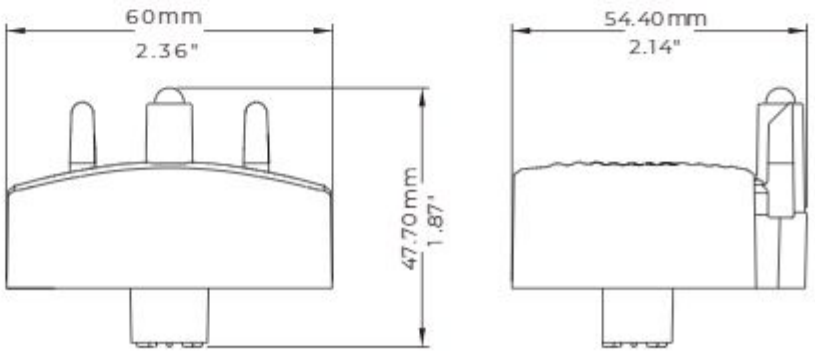

Product Advantage

- Increases Operating Range & Effectiveness of Bluetooth/Smartphone Communication.
- Adding red LED indicator to display the working status,simply tap on the range extender icon within the app, and the range extender will start flashing.
- IP65 rated for harsh environments
- Operating Range: -30° to +45° C
- 9V - 15V AC/DC Power Range

Overview

The Range Extender is an ideal choice for Bluetooth smart products. It can effectively enhance the Bluetooth signal, allowing a Bluetooth range of more than 20 meters or even further. This is particularly essential in large-scale projects where you need to control the lighting of a large property simultaneously.

> Aluminum shell, integrated design, reinforced insulation structure;
> Line-type simple design style, anti-glare, high-end atmosphere;
> Use well-known brand IC, three color temperatures can be switched at will, and the switch is consistent;
> Suitable for shopping malls, specialty stores, hotels and other places;

Jiaxian Exposed Decoration 02 Series

> Select high quality LED chip, lasting bright, low light attenuation, good color restoration;
> Simple and elegant appearance, stepped anti-glare design;
> Product specifications are rich, with different sizes from 3 inches to 8 inches, and different powers from 5W to 24W;
> High-temperature painted aluminum lamp body, resistant to corrosion and oxidation, efficient heat dissipation, and durable;
> Highly transparent PC mask, with high light transmittance, soft light and non-glaring;
> 3C certification, longer life and safer to use;

Material: aluminum alloy | Driver: built-in driver

Pure aluminum material, integrated design, simple and elegant appearance;

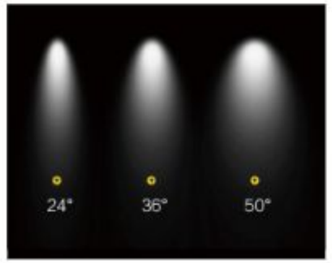

The product specification is rich, with 3-8 inch different size, 4w-30w different power, to meet the needs of different occasions;

Full series of deep anti glare design, with installation and positioning, easy to install;

It can be installed with suspender to realize hoisting, and special clamping screw is installed to ensure safety;

Application place: restaurant, corridor, lobby, shop; application place: restaurant, aisle, lobby, shop;

Seiko aluminum integrated lamp body, rust prevention, no fading, efficient heat dissipation,durable;

Preferred LED chip, high efficiency, energy saving and durable;

High display finger, deep cup anti-glare, more eye protection, too 3C;

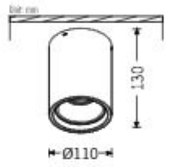

Suitable for shopping malls, exclusive stores, hotels and other places
Installation is convenient and fast, safe and firm;

Material: die-cast aluminum | Driver: external constant current driver

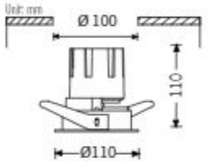

Surface treatment: the fuel injection surface is full and fine;
Die casting heat dissipation: high quality aluminum has good heat dissipation effect;
Face ring: Select small round hole, small square hole, oval hole to meet different lighting requirements;
RA>90, the real color of the object is restored;
Imported chips;
UGR<10 (black cup): ultra low glare control comfortable lighting environment;

NO MAIN LIGHTING APPEARANCE LEVEL AND STRENGTH

Deep anti-glare eye protection,UGR<16
High color rendering performance
Varied and flexible, intelligent and skillful
Full modular design, free DIY
Make lighting design more diverse
Suitable for hotel, home, commercial space and
other high-end places

散热器 Heat sink

High-end ADC12 die-cast aluminum radiator, uniform heat dissipation, high product life;

活动套件 Campaign Suite

The illumination angle is adjustable, with 25 degrees of tilt and 360 degrees of rotation;

光源 Light source

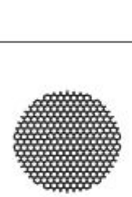

Preferably high light efficiency chip, finger height > 90, three color temperature optional;

透镜 Lens

Professional optical design, accurate light distribution, lens using optical grade PC, high light utilization rate, good anti-glare, beam Angle can choose 15° , 24° , 36° ;

可选蜂窝罩

前环 Anterior ring

Enhanced front ring depth anti-glare design, UGR<16:

面环 Surface ring

The outer ring of the product can be either framed or borderless, and the narrow edge can reach 7mm;

有边框

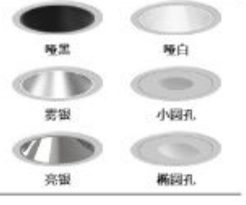

无边框

反光杯 Reflector cup

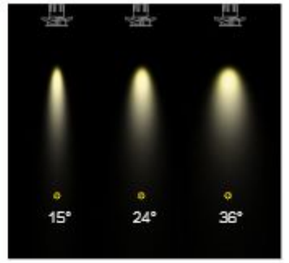

Uniform light spot, soft, no stray light, low glare control to create a comfortable lighting environment;

Material: die-cast aluminum | Driver: external constant current driver

Die-cast aluminum design, high-grade, atmospheric, engineering lamps and lanterns;
The light distribution uses a reflector, the light spot is uniform, soft, and no stray light;
Angle: a variety of angles to choose from 15° /24° /36° to meet different lighting requirements;
Ra ≥ 90, restore the true color of the object;
Cost-effective and more competitive in the market;
Applicable places: commercial licenses, specialty stores and other places;

Material(材质): 铝合金 | Driver(驱动器): 外置恒流驱动

The lamp material is high-end environmental protection die-casting aluminum alloy, line design style, simple fashion, high-end atmosphere;

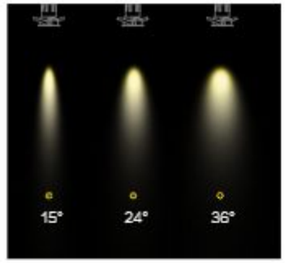

Step deep anti glare structure, with optical grade aluminum alloy vacuum plating reflective cup, high light efficiency, soft spot, no stray light;

Different colors and light distribution angles (15 °, 24 ° and 36 °) can be customized to meet the needs of different scenes;

Isolated constant current drive, high efficiency, no stroboscopic; over voltage, short circuit, over temperature protection, safety guaranteed;

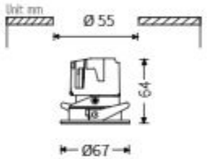

The products are widely used in various engineering projects, real estate, hotels and clubs.

Material: die-cast aluminum | Driver: external constant current driver

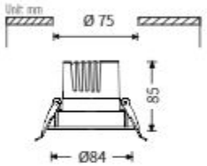

Die-cast aluminum design, high-grade, atmospheric, engineering lamps and lanterns;
The light distribution uses a reflector, the light spot is uniform, soft, and no stray light;
Angle: a variety of angles to choose from 15° /24° /36° to meet different lighting requirements;
Reflective Cup: A variety of reflective cup color options, white/black/gun color;
Ra ⩾ 90, restore the true color of the object;
Cost-effective and more competitive in the market;
Applicable places: commercial licenses, specialty stores and other places;

Material: die-cast aluminum | Driver: external constant current driver

- Pure aluminum die casting shell, integral forging forming radiator;
- The whole electrostatic powder spraying process and anodic oxidation treatment make the surface not easy to be oxidized;
- Aluminum radiator, large area, small thermal resistance, good conduction, air convection design, good heat dissipation effect;
- RA>90, the real color of the object is restored;
- Deep anti dazzle design, three light angles, black reflecting cup design, good anti dazzle effect, meet the needs of professional lighting;
- Suitable for commercial display, hotel catering, museum, home and other architectural lighting functions;

Material: die-cast aluminum + plastic | Driver: external constant current driver

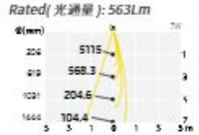

Die-cast aluminum + plastic design, high-end, atmospheric, the preferred product for engineering lamps;
Light distribution using lens, spot uniform, soft, no stray light;
Angle: multiple angles 15° / 24° / 36° to meet different lighting requirements;
Ra ≥ 90, the real color of the object is restored;
High cost performance, more market competitiveness;
Applicable place: business license, exclusive store and other places;

Material: die-cast aluminum | Driver: external constant current driver

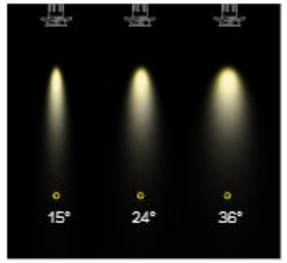

> Pure aluminum die-casting shell, surface electrostatic powder spraying process, high thermal conductivity aluminum heat sink, powerful air convection design, rapid heat dissipation, and extend the service life of the lamp;
> High-quality high-brightness COB light source, high luminous flux, low color tolerance, good color rendering, long life;
> Deep anti-glare design, more precise light control, soft and uniform light spot; three light output angles (15° , 24° , 36°) to meet the needs of professional lighting;
> Multi-directional adjustment structure design of the lamp body (adjustment angle>30° , horizontal rotation 360), a variety of light effects, precise adjustment of the light direction; can perfectly achieve the effect of polarized wall washing;
> Wide voltage constant current isolated power supply, wide voltage input, high efficiency, stable and long life;

Material: die-cast aluminum | Driver: external constant current driver

> Pure aluminum die-casting shell, surface electrostatic powder spraying process, high thermal conductivity aluminum heat sink, powerful air convection design, rapid heat dissipation, and extend the service life of the lamp;
> High-quality high-brightness COB light source, high luminous flux, low color tolerance, good color rendering, long life;
> Deep anti-glare design, more precise light control, soft and uniform light spot; three light output angles (15° , 24° , 36°) to meet the needs of professional lighting;
> Multi-directional adjustment structure design of the lamp body (adjustment angle>30° , horizontal rotation 360), a variety of light effects, precise adjustment of the light direction; can perfectly achieve the effect of polarized wall washing;
> Wide voltage constant current isolated power supply, wide voltage input, high efficiency, stable and long life;

Features:

1、Powerful functions, it can realize stepless dimming and color matching, music linkage, and Tuya intelligent exchange connection
2、With infrared remote control, RGB+CW can realize free magic color, and can also combine multiple lights to show a strong sense of experience.

Material: cold-rolled plate | Driver: external driver

- High quality LED chip, RA > 80, low light attenuation, lasting bright;
- The diffusion plate has high transmittance, scientific light distribution, uniform and soft light; it can effectively protect vision;
- Integrated structure, built-in drive; key components are imported materials, stable performance;
- With open circuit, short circuit, over-voltage protection functions, can work normally in AC180V-265V wide voltage;
- 3C certification, longer life and safer use;

Material: aluminum alloy | Driver: built-in constant current driver

> The product integrates multiple high brightness 2835 SMD light sources, linear combination, high energy efficiency;

> After special process packaging, it is strong and durable, and its service life can reach 50000 hours;

> Green environmental protection, blue light rg0, no ultraviolet, infrared, thermal radiation and mercury pollution;

> LED light will not make the article fade due to irradiation, using high-quality diffusers;

> High color rendering index, the most intuitive and clear display, grid light design, eye protection, anti glare;

> It has fast response and small glare, and reaches full light flux output instantly after lighting;

- High quality LED chip, RA > 80, lasting bright, low light attenuation, soft light;
- The PC cover has high temperature resistance, no discoloration, high transmittance and uniform light;
- Aluminum oxide with bright silver is not easy to fade, with strong thermal conductivity and good heat dissipation;
- The electrical structure meets the requirements of 3C, and the performance is safe and stable;

Material: PC | Driver: Built-in constant current driver

- High quality PC shell, high transmittance PMMA transparent cover + high brightness LED;
- It has the advantages of simple structure, convenient installation and service life of over 30000 hours;
- It has the advantages of environmental protection, low heat, high brightness;
- Low heat, in line with fire safety requirements, safe, stable and reliable.

Material: PC | Driver: External constant current driver

> Silicon casing: insulating, non-toxic, soft and bendable, fireproof, waterproof, heat-resistant, corrosion-resistant, light-transmitting and good thermal conductivity;
> The shape can be arbitrary, cold extrusion is harmless, and the tear resistance is strong; it can be cut and joined, the colors can be mixed and matched, and the colors are adjustable;
>Application sites: seaside, chemical plants, gas stations, tours, living rooms, bedrooms, study rooms, corridors, schools, hotels, museums, jewelry stores, shopping malls, office buildings, etc.

安全电压 Safety Voltage　极低能耗 Low Energy Consumption　阻燃材料 Flame Retardant　安装便捷 Easy to Install

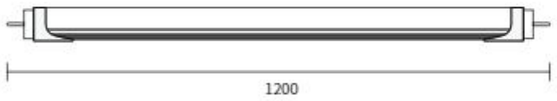

> > Centralized power supply and centralized control type distribution device, its design meets the requirements of GB17945 "Fire Emergency Lighting and Evacuation Instruction System".
> Using light-emitting diodes as the light source, the energy consumption is extremely low;
> Has complete automatic detection function;
> Emergency conversion has no mechanical contacts and has reliable performance;
> The new two-wire communication is more stable, and the polarity-free low-voltage input is easier to install.
> Provide constant output current for multiple series-parallel light-emitting diodes to keep the surface brightness of the lamp constant;

input voltage	DC 36V (type fire emergency lighting)	Implementation standards	GB17945	Features: Programmable Control, switch lights on and off, Sound and light fault alarm lamps There is no battery inside, maintenance Convenient care.
power	5W	main material	Flame retardant plastic	
light flux	200 Lm	installation method	Gua Bi	
emergency time	≥ 90 min	physical dimension	210x102x44mm	
protection lvl	IP30	installation distance	192mm

Material: Glass &PC | Driver: Built-in constant current driver

> Using constant current power supply, it has strong durability and short response time;

> The transmittance is as high as 90%, the light is uniform, and the optical visual effect is good;

> Ultra high luminous efficiency: it is made of ultra-high brightness LED;

> It adopts 5.8G radar sensor with high sensitivity and strong anti-jamming ability, and the sensing distance is 5-8m;

> Built in light switch, intelligent and energy saving;

> No mercury, no radiation, low heat, energy saving and environmental protection., Long life;

Material: aluminum alloy | Driver: built-in driver

It is made of high-quality aluminum material, which is oxidized, polished, sandblasted, rustless and colorless;

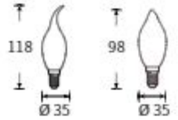

Convection design improves heat dissipation efficiency;

High quality material lens, accurate light distribution and uniform spot;

High quality cob light source, energy saving and high efficiency, good color temperature consistency;

Material: PC | Driver: built-in driver

The lamp body is made of high heat dissipation aluminum, heat conductive plastic, compact material and strong heat dissipation;

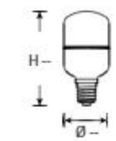

Thickened aluminum substrate has good thermal conductivity;

High quality SMD LED light source and efficient driver: high luminous efficiency, high color rendering, long life;

It can save more than 90% energy than traditional white woven lamp, which is economical and durable;

Material description: The heat dissipation part of the product is made of high-purity aluminum, which has good heat dissipation effect;

Treatment process: The entire product is spray painted and anodized, and the surface of the product is not easily oxidized;

Heat dissipation technology: heat dissipation adopts extrusion molding technology, with small thermal resistance, good conduction, and thermal conductivity up to 230W/mk; large heat dissipation area, scientific air convection design, and good heat dissipation effect; optical technology: professional optical design, accurate light distribution, lens Using optical grade PMMA, it has high light utilization rate and good anti-glare;

Product function: Suitable for commercial display, functional lighting in hotels, restaurants, museums, homes and other buildings;

Material Description: One-piece die-cast aluminum shell, high purity aluminum metal;
Processing technology: The entire product is spray painted and anodized, so the surface of the product is not easily oxidized;
Cooling technology: The heat dissipation adopts forging molding technology, which has low thermal resistance, good conduction and thermal conductivity as high as 230W/mk; large heat dissipation area, scientific air convection design and good heat dissipation effect; professional optical design, accurate light distribution, the lens adopts optical grade PMMA, and the light utilization High efficiency and good anti-glare;
Optical technology:
Product Features: Suitable for commercial display, functional lighting in hotels, restaurants, museums, homes and other buildings;

Material Description: Made of aluminum alloy die-casting;
Processing technology: The surface is treated with anti-UV sand spraying technology, giving it a strong texture;
Cooling technology: Using metal conductive heat dissipation;
Optical technology: Highly transparent PMMA material, with a light transmittance of 95% and a maximum light control efficiency of 90%;
Product Features: suitable for commercial displays, hotels, restaurants, museums, homes and other architectural functional lighting

Integrated refraction mask: Made of thickened aluminum, it increases the refracted light-emitting area and widens the irradiation range;

Engineering quality: wide lighting range: strong luminescence, high brightness, greatly increased irradiation range, softer light, no harm to the eyes;

Reshape the design of heat dissipation and thickened aviation aluminum: innovative heat dissipation system design, increase air convection area and flow direction, accelerate heat dissipation effect, improve stable lighting; break the limitations of crystal convex lens: semi-condensed lampshade with 90° optical lens, significantly increase the light effect and irradiation distance , can cope with different large-scale lighting places;

Simple operation, stable and reliable installation method: strong rust-proof boom chain, simple and quick

Using high-quality chips, the light is even and non-dazzling. Die-cast aluminum has excellent heat dissipation effect and longer service life. Explosion-proof tempered glass has high light transmittance, firm installation and durability. Sealed glue power supply, waterproof and moisture-proof, safer, protection grade IP65.

Aluminum alloy lamp body, tempered glass surface, fully waterproof structure design (IP65); Imported ultra-bright LED chips, the irradiation distance is longer;

INTELLIGENT **SYSTEM**

Fast and stable wireless control experience

No sense of delay, quick response
Bring you millisecond-level intelligent control experience
Telecom level stability
Provides the same stable control experience as wired systems

BLE Mesh networking
Automatic networking, consistent response, whole house coverage
LAN priority policy
Fast response, safe and stable, controllable network outage

Intelligence is not to change habits but to provide more choices
